

# Bera Bıyık

## Software Engineer

As a Frontend Developer who graduated from computer engineering, I have 3 year of experience in Frontend Development. With this technical knowledge, I focus on developing customized user experiences using modern web technologies. I am a person who can work efficiently with teams with my strong analytical thinking, problem solving and communication skills. I have an investigative personality and a passion for learning. My goal is to make a successful career as an advanced Frontend Developer and to constantly improve myself by following the latest technologies and trends in the industry. I aim to work to understand customer needs and create impressive user experiences using user-oriented design principles. I also aim to be actively involved in a work environment based on innovation and continuous learning by collaborating in a great team.
